creating a healthy Orange County
Our Mission
AIDS Services Foundation seeks to end the AIDS epidemic for men, women and children in Orange County through effective HIV prevention, linkage to care and treatment, while eliminating the stigma of AIDS.

Our Story
A small group of volunteers founded AIDS Services Foundation (ASF) Orange County in the late summer of 1985 because people were dying, had nowhere to turn and desperately needed help. ASF is now the largest and most comprehensive nonprofit HIV/AIDS service provider in Orange County, with a staff of committed and caring individuals, a board of directors and advisory council of highly respected community leaders, and hundreds of dedicated volunteers.
A Message from the
Board President & Executive Director/CEO

This year, our message to you is simple albeit unconventional: *The world is a mess!*

Fake news, mounting racial tension, terrorism, economic uncertainty, cyber hacks and changes in government policies threaten not only what we have and hold dear but also what we have envisioned for the future.

So, let’s embrace it.

Depending on how you look at it, this mess may be perceived as a harbinger of doom or an opportunity to stand as tall and as brave as that small and courageous group of individuals from Laguna Beach who founded AIDS Services Foundation Orange County (ASF) in 1985. Against all odds, and in the throes of the HIV/AIDS epidemic that was claiming the lives of beloved family members and friends, they boldly faced what many were too afraid to confront. Vowing with certainty to make a difference rather than focus on where to place blame, they willingly and fearlessly put aside their religious beliefs and political preferences to unite for a common good.

Only by banding together can we persevere and win the battle against HIV/AIDS.

Undoubtedly, the world has witnessed extraordinary advances in science and medicine. Yet, even with a cure as close as hand as 2027, there is so much more work to be done in the interim. Statistics provided by the Orange County Health Care Agency indicate that in 2016, 320 Orange County residents were newly diagnosed with HIV—in addition to the 48 that were concurrently diagnosed yet unaware they had been living with the disease. This slight increase from 2015 reminds us that there is no time to waste in complacency.

Our strength in numbers will lead us to zero.

Through this year’s annual report, we once again express our gratitude for your selfless financial contributions and emotional support. We know it is not always easy to wade through the distractions in front of us and find our way back to our mission and purpose, as well as our compassionate roots that have guided us thus far. We thank you for your courage and kindness and hope that you will always remember there is darkness before the dawn.

With you by our side, we will remain unafraid and dauntless in our pursuit to end the AIDS epidemic.

Thank you,

Jeffrey Elder, Board President       Philip Yaeger, Executive Director/CEO
ASF Client and Family Services

Since ASF’s founding in 1985, it has been our mission and our goal to provide care and comfort to those infected or affected by HIV/AIDS. Thankfully, as we continue to discover new medications and protocols to decrease infection and improve health and well-being, ASF has been gradually shifting its focus to ending the HIV/AIDS epidemic in Orange County. With prevention, education and testing at the forefront of our mission, we must keep those at risk from contracting the virus by successfully identifying those who live with HIV. Once their status is known, ASF can offer them lifesaving care that will reduce their viral load and make them less likely to transmit the virus to someone else.

Health Education and Prevention

ASF’s Health Education and Prevention programs seek to inform and teach the public to avoid contracting HIV. According to statistics, it is the most effective way to prevent new HIV diagnoses. In January of 2017 we introduced PrEP Navigation Services which enrolls high-risk, HIV-negative clients on to HIV-preventative medication.

In addition to working with the general public and at-risk communities on prevention education, ASF health educators work with those already living with HIV, instructing them on ways to prevent the spread of HIV. ASF offers individual-, group-, and community-level interventions. The programs and activities are provided at no cost to participants. Group- and community-level interventions provide refreshments to all participants in attendance. In 2016 alone:

- **70** speaking engagements were offered through the Positively Speaking program, reaching more than **2,577** participants in junior high and high schools, colleges, universities and community settings, discussing real-life facts about HIV/AIDS in Orange County.
- **12** Mpower seminars, to teach condom negotiation skills and other safer sex techniques, were provided to **302** Spanish-speaking, Latino, gay/bisexual men aged 18–29, an increase of **161%** from 2015.
- **2,738** individuals participated in **82** HIV 101 educational seminars at the Newport Hoag Chemical Dependency Center, compared to last year’s 10 seminars that reached 187 individuals.
- **957** individuals attended **7** large-scale outreach events.
SOMOS Program

SOMOS is an HIV prevention social group for Men who have sex with men (MSM) youth ages 18–29, which uses an Mpowerment project model designed to address the needs of young gay/bisexual men. This program enacts a sex-positive intervention that teaches the participants about HIV and STIs, safe sex practices, HIV testing and PrEP medications. Additionally, SOMOS conducted a large-scale outreach event that offered 360 participants condoms and lubricants, education on safer sex practices, and information on how to access HIV testing. Below is a list of the programs and activities that were provided at no cost to participants in 2016.

12 Mpowerment events were held to empower participants to reduce their risk of HIV and other sexually transmitted infections

54 SOMOS Multi-Session Core Group meetings took place to educate and empower participants

Case Management

Continuously looking forward to an Orange County beyond the AIDS epidemic, ASF understands how case management can play a primary role in keeping our community healthy. Through this comprehensive care program that addresses the complex needs of individuals and families living with HIV while removing barriers in the care system, ASF’s case management approach to care ensures that each client receives assistance tailor-made to his or her personal needs.

In addition to assisting in securing public and private benefits available in the wider community, ASF’s case managers link clients to the array of free services provided by the agency, such as food, housing, transportation, mental health services and family services. With an overarching goal to keep clients in care, case management facilitates clients’ autonomy and movement toward self-advocacy so they can rejoin the community as healthy, productive individuals. Through meaningful connection, medical care and assistance with back-to-work programs, case management ensures that clients focus on a future of maintained health and self-sufficiency.

1,339 unique clients accessed Case Management services

10,992 direct care coordination contacts

18,975 service coordination contacts

27 clients were provided with home health care and/or DME
ASF HIV and Hepatitis C Testing Services

In 2016, 320 persons in Orange County were newly diagnosed with HIV, in addition to the 48 persons who were concurrently diagnosed with AIDS but were unaware for a significant period of time that they had been living with HIV. As these numbers show a slight increase from 2015, testing remains among the most important methods to stop the virus’s spread. In fact, statistics show that when a person is identified as HIV-positive by ASF and is linked with care through the agency, they become healthier and considerably less at risk of unknowingly spreading the virus. Because ASF recognizes the importance of early and frequent testing, we are committed to responding with increased testing and outreach in at-risk communities and the community in general. In addition to testing at our offices in Irvine, RADAR, ASF’s CDC-funded high impact prevention project located in Santa Ana, helped increase total HIV tests administered to the community by 42%.

Nutrition Services

We cannot even begin to envision a future beyond the AIDS epidemic unless we strive to keep those who have tested positive adhering to their medications. Because of the risk of toxicity and side effects of HIV medication regimens, having the right food available to help take medications is an imperative part of adherence. Nutrition Services is an integral part of treating the client as a whole to maintain a reduced viral load and reduce the chance that any of our clients will transmit the virus to another individual.

ASF’s Nutrition Services program provides groceries, vitamins, nutritional supplements and nutritional education through its on-site food pantry for people living with HIV/AIDS who often lack the financial resources to purchase the items themselves.
Transportation

Clients can significantly reduce their viral loads and prevent the further spread of HIV with regular medical visits and case management assessments. Because having the means necessary to arrive safely and promptly at appointments and meetings is the vital link to success, transportation has become an integral part of ASF’s client prevention methods and services. To help them achieve the best possible outcomes, ASF offers qualified clients a multi-tiered transportation system comprising Orange County Transit Authority (OCTA) passes, subsidized coupons for use on the OCTA’s ACCESS bus system, subsidized taxi rides and transportation provided on ASF vans and buses operated by ASF drivers. Depending on the client’s need as assessed by a case manager, any or all of these methods of transportation could be used.

Housing

Because ASF understands how important it is to have basic needs met before persons living with HIV/AIDS can begin to think about their own well-being and that of others around them, reliable and secure housing is critical. In addition to the STAR (Short-Term Assistance for Rent) and HPP (Housing Plus Project) programs, which makes direct rental subsidies available to landlords on behalf of qualified persons with HIV/AIDS and their families, ASF offers financial assistance for rent and mortgage payments, utilities subsidies, rental deposits and emergency and transitional housing so clients can focus on their own current and future health.
Mental Health

Openness and honesty are undoubtedly the cornerstones of a future free of the HIV/AIDS epidemic. That’s why ASF encourages truth not only with self but also family, friends and sexual partners, which is tremendously difficult. While these relationships are most likely to be at greatest physical risk when an HIV-positive diagnosis has been made, there are the equally damaging and destructive emotional risks that come with feelings of deceit, hopelessness and uncertainty. Through the agency’s mental health program, support groups and individual counseling are offered, both to clients who have not found a way to disclose their status to sexual partners to prevent further infection, and to affected family members who may need a safe harbor and encouragement to face HIV with dignity and hope.

Thanks to the support of generous donors, the following services were provided free of charge in 2016 and conducted by licensed therapists and psychologists with an acute understanding of the needs of HIV-positive individuals.

Volunteers

Volunteers are the heart and soul of ASF, and a primary reason for the foundation’s continued success. Whether assisting in the food pantry fulfilling orders or making deliveries, performing office tasks, providing HIV testing or helping at events, this dedicated and compassionate corps of volunteers contributes not only valuable time but also emotional support for those who are among the most vulnerable.

In 2016, 572 individuals volunteered 21,961 hours of service for ASF. The dollar value of this assistance, based on the valuation of $27.59 per hour for volunteer time in California as established by Independent Sector, totaled $605,903.99. ASF registered 59 new volunteers this year and utilized 42 undergraduate interns.
Wilbur May Family and Children’s Programs

Family and Children’s Programs aim to give families impacted by HIV/AIDS access to services and activities that will ease their financial burden and provide them with fun family outings and enrichment opportunities. By offering children infected and affected by HIV a safe place to share their feelings about living with the disease without discrimination or judgment, the program opens a door to release the shame and guilt that often weigh heavily on these brave young hearts.

Last fiscal year, 80 families were served by programs and activities made possible in large part through generous donations by Anita May Rosenstein and the Wilbur May Foundation. Services were once again provided through a partnership with the Segerstrom Center for the Arts and through gifts from other private donors, which benefited 232 unduplicated individuals.

- 40 clients and their families participated in a day of fun at Knott’s Berry Farm
- 109 school-aged children of clients were provided with backpacks, basic back-to-school supplies and gift cards for new shoes and school clothes
- 18 children participated in a visual arts program at the Segerstrom Center for the Arts, which encourages young people to express themselves through creativity
- 72 clients and family members enjoyed relaxation and exhaustive fun at Family Camp
- 136 kids received new toys, clothing, electronics and gift cards through the Holiday Gift program
- 15 children were able to participate in sports, art programs and educational courses, including summer camps and retreats, karate, hip-hop, piano, pitch, Little League baseball and soccer
- 10 kids and teens participated in 7 outings provided to positive youth clients volunteered their own time at a community service event
- 18 children participated in 30 weeks of Kids Club sessions that provide support for HIV/AIDS-infected and -affected youth
- 6 teenagers attended a week-long arts camp at Camp Hollywood Heart in Malibu with other HIV-positive and affected youths
- 70 client families received a total of 280 movie passes
ASF Support Resources

Counting Down to Zero with Increasing Support from Generous Donors Like You

Working year-round with board members, as well as corporate, civic and community leaders, ASF’s Fund Development department is tasked with identifying and securing financial resources to continue the agency’s vision for the future, which includes a world free of HIV/AIDS. In addition to fostering relationships with individual donors through the Patron’s Council and Partners for Life legacy program, the department is responsible for securing critical contributions and grants from foundations, corporations and government agencies. Through events such as the Annual Gala, AIDS Walk Orange County, Orange County Ride for AIDS and Dining Out for Life, ASF staff and an entire community of supporters successfully work together to achieve what was once considered an impossibility.

AIDS Walk Orange County 2016: Reclaiming the ’80s

Saturday, May 14, marked the 30th Annual AIDS Walk Orange County (AWOC) and a renewed resolve to heal an era devastated by the outbreak of the AIDS epidemic. With music and fashions reflecting this year’s “Reclaiming the ’80s” theme, more than 1,300 participants, including a diverse group of walkers, volunteers and supporters, raised an amazing $350,000 to support the important work of ASF. Gathering at William R. Mason Regional Park in Irvine, attendees enjoyed music by Men Alive from the Orange County Gay Men’s Chorus, who kicked off the walk with a decade-appropriate performance that set the tone of the entire event. In addition to a food festival providing refreshments, participants could visit the AIDS Memorial Tent and view the OC Memorial Quilt Panels presented by Shanti Orange County, a recipient agency of AWOC 2016. For the third consecutive year, participants living with HIV/AIDS could also choose to register for AWOC with The Survivor Club, which allowed them to be openly honored at the walk.
7th Annual Orange County Ride for AIDS: Canyons to the Coast

It was a picture-perfect day for the 7th Annual Orange County Ride for AIDS (OCRA), which took place on October 22, 2016. One of ASF's premier fundraising events, OCRA raised more than $100,000 through the 140 adventurous registered riders who cycled through some of South Orange County's most breathtaking scenery and vibrant beach towns. Start and finish lines were established at William R. Mason Regional Park in Irvine, with a 7:30 a.m. opening ceremony that encouraged and energized the participating groups, families and individuals, who had the choice of three designated routes offering three levels of difficulty, from challenging to beginner friendly. Along the Century (100 miles), Metric Century (64 miles) and Taste of OCRA (30 miles) routes – each fully staffed and supported by chase vehicles – cyclists enjoyed expansive coastline vistas and picturesque canyon views, as well as delectable lunch offerings provided by gourmet food trucks positioned at strategic pit stops. From the undulating hills of the notorious Santiago Canyon Run that climb up the infamous Live Oak Canyon Road, to the heartfelt positive energy of every person in attendance, OCRA's mission was clearly defined and accomplished!

Dining Out for Life®

Once again, ASF was honored to partner with Dining Out for Life, the nationwide program conceived in 1991, which invites restaurants to donate a minimum of 25 percent of their food and beverage sales to a specified organization. Thanks to the hundreds of diners who enjoyed a meal at restaurants all over Orange County on September 15, 2016, ASF received proceeds of $19,000 from 13 generous local participating restaurants: Anaheim Whitehouse, Durty Nelly's, Maro Wood Grill, Pieology (Westminster), Plum’s Café, Port, Samba Brazilian Steakhouse, Square One Pizza, Sundried Tomato (San Clemente and San Juan Capistrano), Velvet Lounge and Zinc Café (CDM and Laguna Beach).
ASF’s 2017 Annual Gala: An Evening in Paris

The Annual Gala, the foundation’s signature fundraising event—and its most glamorous—was held Saturday, January 21 at [AV], a breathtaking, state-of-the-art entertainment venue in Irvine. Enjoying mimes, magic, unexpected music and an extravagant gourmet dinner, many of the 350 guests donned Parisian evening attire to celebrate this year’s theme, “An Evening in Paris.” Building on the tremendous success of the renowned “Big Splash,” which was the catalyst of this annual ASF event, the gala included a game of “stars” that created a path of opportunities for guests to support the wide range of services offered by ASF. In addition to a silent auction filled with worldly treasures and gifts, this year’s live auction items included a customizable five-day trip to Paris, complete with round-trip business-class seating. Truly a night to remember, the gala raised more than $350,000 and strengthened the tremendous bonds between ASF and its dedicated supporters that continue to work toward ending the AIDS epidemic in Orange County.

ASF continues our dedication of allocating as much of our donors’ gifts as possible to the provision of quality care, education and prevention services for people in Orange County affected by HIV/AIDS. During the 2016–17 fiscal year, 85.4 percent of funds received were expended on those programs and services. Fundraising efforts and administrative costs necessary to support the agency’s work accounted for the remaining 14.6 percent.
Our Donors 2016–17

Thank you to our generous donors who support AIDS Services Foundation Orange County to prevent the spread of HIV and improve the lives of men, women and children affected by HIV/AIDS in Orange County.
